Summary

I am a logical and creative developer who takes delight in all projects I get involved in. I take pride in my ability to adapt to evolving situations and pivot when necessary. When faced with a new challenge, I take it on piece by piece, with enthusiasm and fervor.

Technical Skills

Ruby • Rails • Sinatra • Middleman • Postgres • SQL • ActiveRecord • HTML5 • Javascript • jQuery • CSS3
SASS • JSON • Ajax • Git/Github • Adobe Photoshop • GIMP
Adobe Lightroom • Sketch • Figma • Basecamp • Trello

Soft Skills

Creative Problem Solving • Project Management • Team Leadership
Client-Focused • Design-Minded • Collaborative • Self-motivated • Self-directed

Experience

Le Wagon

Student/Web Developer

Tokyo, Japan

2017

Background:

- Worked in sprints to design, develop and deploy web applications catering to students
- Used common and powerful gems including Devise, Stripe, CarrierWave, Rubocop and Pundit as well as increased exposure to common APIs

Projects:

Curator

<https://www.thecurator.online/> • Designed and developed by a team of three, Curator seeks to help students of any level know more about the text they are reading. By using an annotation, comment and upvote system, students can get answers to their questions with more context than a simple Internet search would provide.

- **Front end:** Bootstrap, jQuery, Javascript, SASS
- **Back end:** Ruby, Ruby on Rails, Postgres, Pundit, Devise, Carrierwave, Google Cloud Platform
- Responsible for all front end design and implementation as well as back end logic
- Required quick pivots when the project encountered unforeseen challenges

Book Trader

<https://book-trader-cm.herokuapp.com/> • Created to allow students to buy and sell their books to others at nearby universities, BookTrader is meant to be an alternative to having to go to the university book store.

- **Front end:** Bootstrap, jQuery, SASS
- **Back end:** Ruby, Ruby on Rails, Postgres, Devise, Carrierwave

Sound Investment AV

Lighting Designer/Team Lead

Chicago, IL, USA

2010-2016

- Designed, programmed and executed events and shows for various brands and artists across the United States
- Collaborated with other members of the design team as well as clients and sales staff to ensure the event exceeded expectations
- Managed teams of up to 15 technicians in the setup, running and tear down of events and concerts

Education

Le Wagon Full Stack Coding Bootcamp Tokyo, Japan

2017

Bachelor of Fine Arts, DePaul University Chicago IL, USA

2009
